

3A Technology Solutions

BRAND IDENTITY STANDARDS

A practical standard for creating consistent, recognizable and professional 3A communications across social media, websites, presentations, advertising, video, AI-generated content and other marketing materials.

SMART. SIMPLE. PROFESSIONAL. HUMAN. FUTURE-READY.

INTERNAL / PARTNER REFERENCE
Version 1.0 • October 2026

01 | BRAND FOUNDATION

What 3A stands for

3A Technology Solutions is a modern technology brand focused on making technology useful, understandable and commercially valuable. We help businesses, organizations and individuals use websites, AI, automation and digital solutions to solve real problems and move forward.

Brand essence

Technology that works for people and business.

Brand personality

SMART	We communicate with intelligence and substance, without unnecessary complexity.
SIMPLE	We reduce complexity and present technology in a way people can understand and use.
PROFESSIONAL	Every touchpoint should feel intentional, reliable, polished and credible.
HUMAN	We speak to people, not machines. We are approachable, respectful and practical.
FUTURE-READY	We embrace modern technology while staying focused on real-world outcomes.

Core principle

We do not sell technology for technology's sake. We show how technology can improve business, productivity, communication, visibility, decision-making and growth.

02 | VISUAL IDENTITY

The 3A visual language

3A uses premium minimalism: clean layouts, strong hierarchy, generous whitespace and controlled visual accents. The identity should feel like a serious modern technology company—not a generic IT vendor and not an overly futuristic 'cyber' brand.

Primary color system

Color rules

Navy is the anchor and should dominate major backgrounds, headings and brand surfaces. Yellow is an accent: use it for calls-to-action, highlights, key numbers, dividers and moments that need attention. White and light gray create breathing room. Avoid using many additional colors unless the content requires them.

Typography

Headlines: modern, bold sans-serif with short, confident statements. Body: clean, highly legible sans-serif with comfortable line spacing. Typography should create hierarchy through size, weight and spacing—not decorative effects.

Graphic language

Use subtle grids, thin lines, restrained geometric structures, clean cards, minimal UI elements and understated digital/data motifs. Keep technology sophisticated but approachable. Avoid visual clutter, excessive gradients, neon cyberpunk effects, heavy 3D decoration and unnecessary animation.

03 | LOGO & BRAND MARK

The logo is the primary identifier

The supplied 3A Technology Solutions logo is the authoritative reference for the brand mark. Use the original artwork whenever possible. The logo should remain recognizable, balanced and unobstructed across every medium.

Always:
- Preserve proportions.
- Keep clear space around the mark.
- Use high-quality artwork.
- Maintain the core navy/yellow identity.

Never:
- Stretch or distort.
- Randomly recolor.
- Add shadows, glows or effects.
- Place it over a busy background.
- Redraw the mark casually.

Logo placement

On marketing materials, prefer a quiet, intentional placement—typically a corner, header, footer or dedicated brand area. The logo should support the content, not compete with the main message.

Brand recognition rule

A viewer should be able to recognize a 3A asset from its color, typography, composition and tone even when the logo is small or temporarily absent.

04 | IMAGERY & CONTENT STYLE

Photography and visual content

Prefer authentic, premium and purposeful imagery. Where relevant, show real Nigerian/African business environments, entrepreneurs, professionals, technology workspaces, products, projects and tangible business outcomes. Images should feel credible rather than staged.

Real people and realistic business settings	Generic corporate stock scenes with no connection to the message
Clean product/UI screenshots and purposeful technology	Random holograms, excessive neon and 'sci-fi for the sake of sci-fi'
Strong project photography and visible outcomes	Over-edited, artificial-looking imagery
Simple compositions with a clear focal point	Crowded compositions and too many competing elements

Composition rule

Every asset should have one clear message and one dominant visual focal point. Use hierarchy, spacing and contrast to guide the viewer. Do not attempt to communicate everything at once.

05 | VOICE & COMMUNICATION

How 3A speaks

3A communicates with clarity rather than hype. We are knowledgeable without being intimidating, confident without being arrogant, and persuasive without making unrealistic promises.

CONFIDENT	Say what we know. Avoid exaggerated claims.
CLEAR	Prefer simple language over technical jargon.
PRACTICAL	Connect technology to real problems and outcomes.
EDUCATIONAL	Help people understand why something matters.
HUMAN	Write naturally. Speak to the reader, not at them.
OPTIMISTIC	Show possibilities without promising guaranteed results.

Writing principles

- Lead with the problem or opportunity.
- Make the benefit obvious.
- Use short paragraphs and strong headings.
- Use technical terms only when they add value.
- Avoid 'revolutionary', 'guaranteed', '100% success' and similar hype.
- End marketing content with one clear next action.

06 | CROSS-FORMAT CONTENT SYSTEM

One brand. Many formats.

The 3A identity must remain recognizable whether the output is an Instagram post, video, website, presentation, proposal, advertisement, AI-generated image, document or printed material.

SOCIAL MEDIA	Strong hook, minimal text, bold hierarchy, navy/yellow accents, clear CTA.
VIDEO	Clean opening frame, restrained motion, modern typography, purposeful transitions, confident voiceover.
WEBSITE	Whitespace, clear navigation, conversion-focused sections, premium technology aesthetic.
PRESENTATION	One idea per slide, large headlines, strong visual hierarchy, minimal decoration.
PROPOSAL / PDF	Structured information, clean grids, navy headings, yellow accents, professional readability.
AI-GENERATED VISUALS	Realistic, premium, human-centered technology; Nigerian/African context when relevant; avoid generic sci-fi.

Consistency test

Before publishing, ask: Does this feel like 3A? Is the message immediately clear? Is the design clean? Is the technology practical rather than performative? Is there one obvious action for the audience? If the answer is no, revise.

07 | MASTER BRAND PROMPT

Use this with AI tools, designers and content teams

3A Technology Solutions brand DNA: premium minimalist technology aesthetic; deep navy, warm yellow, white and light cool gray palette; clean modern sans-serif typography; generous whitespace; refined geometric and digital elements; sophisticated but approachable technology visuals; authentic Nigerian/African business context where relevant; intelligent, confident, practical and human communication; technology presented as simple solutions to real business problems; no clutter, excessive gradients, neon cyberpunk aesthetics or generic corporate stock imagery. One clear message, strong visual hierarchy, purposeful yellow accents, clean logo placement, premium modern-tech finish. Preserve the original 3A logo proportions and identity whenever the logo is included.

How to use it

Add the master prompt to the beginning or end of a project-specific instruction. Then describe the actual content you want. The brand system should control the look and voice; the project brief should control the subject, audience, platform, format and objective.

Example

Brand direction: [Master Brand Prompt]

Project: Create a 9:16 Instagram Reel explaining why Nigerian businesses need professional websites. Target small businesses and artisans. Use a strong opening hook, three practical benefits and a final CTA to DM 'WEBSITE'.

08 | QUICK REFERENCE

If you remember only this

LOOK	Minimal • Premium • Modern • Spacious
COLORS	Navy first • Yellow as accent • White/light gray for space
TYPE	Clean sans-serif • Strong headlines • Highly readable body text
IMAGERY	Authentic • Purposeful • Human • Business-focused
VOICE	Clear • Confident • Practical • Educational • Human
MESSAGE	Technology should solve real problems.
LAYOUT	One clear message • One focal point • One CTA
AVOID	Clutter • Hype • Neon cyberpunk • Generic stock • Excessive effects

3A Technology Solutions

Ideas • Technology • Impact

This document is the standard reference for the 3A brand identity. When in doubt, choose clarity, simplicity, professionalism and usefulness.
